EXPERIENCE AND INTERNSHIP

•Syracuse University   *May 2019 – Now*
 Research Assistant   Syracuse, NY
 – Advisor: Prof. Bryan S. Kim
 – **Capacity-variant storage systems**: exploiting the tradeoffs among capacity, performance, and reliability (CPR) in SSDs for performance stability and aging-resilience (NSF Award # 2008453).
 – **Self-learning storage systems**: imbuing intelligence to the storage devices so that they can self-learn, self-configure, and self-manage.
 – **Next-generation storage stack with key-value / ZNS devices**: exploring the design of a storage stack using key-value / ZNS devices instead of traditional block devices.
